

A good yearbook tells the story of a year. A great one tells it with style and flair. That's where **theme** comes in. Think of theme as the personality behind the yearbook. It's what makes one book stand apart from another.

The best themes help you define the year through any combination of words, phrases, colors, graphics, angles and voices. It's good to find a theme that is specific enough to be recognized and understood, yet open enough to allow the book to evolve with the unfolding of the school year.

#### "UNEXPECTED"

Helios, Sunny Hills High School, Fullerton, Calif

But for the majority of school years that are not so specific, you should seek to create a personality for the book based on the sights, sounds, colors and happenings that drive the students. Sure, these might be similar to years gone by, but your job as the eyes and ears of the school is to find the uniquely personal ways that those usual sights and sounds played out in your PARTICULAR year.

- Start with the Words-Verbal
  - What is new or different at your school?
- Then work on the Visual
  - There should be at least three elements on your cover to use throughout your book

#### TYPES OF THEMES:

A traditional way to approach theme is through the use of catchphrase expressions. These might be popular phrases or plays on words that allow staffs to carry out the theme in various sections of the book. These types of themes can be especially powerful if they have a direct connection to what is happening at school. For instance, a school that is going from a traditional to a block schedule might play off of a common expression like "Around the Block" and show how the new schedule influenced every area of student life.

VISUAL

Colors, graphics and fonts that relate to the year can create a stunning, eye-catching approach to unifying the book without saying a single theme-related word. Bold, vibrant colors with large, hard-edged graphics will project a totally different personality from a book colored in subtle earth tones, simple fonts and understated designs. The first would work for a year that was spirited and "in your face;" the second tells the story of a quieter or more status quo year.

Tükwet, Rancho Cucamonga High School, Rancho Cucamonga, Calif.

Often based on some kind of identity or psychological angle, concept themes will only work if students can understand and relate to them. The yearbook is not the place to take things too seriously, nor is it the place where students are going to "discover" who they are. Concept themes can be amazing when done well. When poorly executed, they will leave readers confused or, even worse, bored.

Wolf's Eye, Oswego East High School, Oswego, III.

Some staffs prefer to tell the story of their year chronologically because it allows them to cover more topics. This could be as simple as arranging events in the order in which they occurred, or it might mean covering several events on a single spread as part of a week-by-week look at the year. The challenge with calendar coverage is to figure out where certain academics might fit in, or where to put the mug shots in terms of weekly organization.

#### "IT'S ABOUT TIME

Decambian, Del Campo High School, Fair Oaks, Calif.

#### WHERE TO PUT THE THEME:

#### COVER

Depending on the theme and how you intend to reveal it, you could be quite literal and spell it out on the cover. Or you could just give a hint of what is inside and make your readers open the book to figure it out.

"WE KNOW"

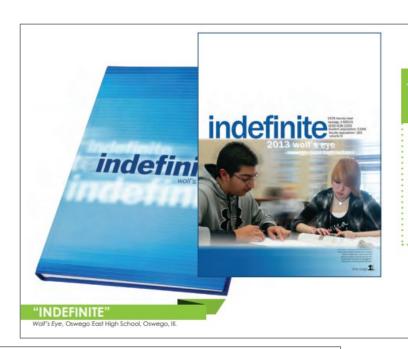

Lair, Shawnee Mission Northwest High School, Shawnee, Kan.

#### **ENDSHEET**

If you print your endsheets, it makes sense to include them in your theme. It could be a continuation of what started on the cover. Or a reinforcement of a theme already stated. Maybe it's just a graphic or a color that connects visually to the theme. Whatever is done on the endsheet should connect to the rest of the book in some way, and theme is a great place to start.

#### TITLE PAGE

Since the theme is often used as the title of the book, it makes sense to include it on the title page. The actual name of the yearbook should be there as well, but the theme title (if there is one) should take top billing.

#### OPENING SPREAD(s)

While the theme will continue to unfold graphically on the opening pages, this is also where the verbal expression will begin to take shape. Theme copy should announce, explain or illustrate the theme so the reader can come along for the ride.

#### DIVIDER/CONNECTOR/ THEME PAGES

However you plan out the book (sections, calendar segments, or even no sections at all), include some kind of scattered pages to carry out the theme. This is a great way to make sure the book hangs together without necessarily having each and every spread scream theme. Traditional sections will have traditional divider spreads to introduce their content and show how it relates to theme. Calendar themes might have spreads that break up the book into seasons or months that tie those time chunks into the theme. Books with scattered coverage throughout can use similarly scattered theme pages to simply ensure that the theme travels along throughout the book.

#### BIGGER THAN YOU

We felt united when we left Woodland. Through the endless 7:30 a.m. practices to the after school math club

We're in this together.

#### **#BIGGER THAN US**

Everyone felt accomplished when they left Woodland.

Whether they visited for a day, stayed for two years, or worked here for decades they are forever changed. Old students come to teach at Woodland; students grow up and walk their children through the front door. Years pass and our mascot changes.
